SUMMARY

WordPress Developer & Tech Lead with 10+ years building secure, scalable solutions for global clients including the UN, Dell, and Vodafone. Skilled in PHP/MySQL architecture, REST APIs, and leading Agile teams to improve performance and engagement.

WORK EXPERIENCE

Founder & Lead Developer @ JahezLMS

JUN 2025 - PRESENT

- Building a multi-tenant WordPress SaaS LMS platform from scratch, architecting WP multisite infrastructure to serve independent client tenants under a single codebase.
- Designed tiered subscription model (Trial/Basic/Pro/Agency) with usage-based plan limits enforced via custom PHP logic.
- Solved video hosting scalability by engineering automated YouTube upload pipeline, eliminating shared-hosting storage bottlenecks.

Senior WordPress Developer @ Untap Technologies

OCT 2019 - JUN 2025

- Led development and maintenance of Untap's competition management system, supporting 200+ programs.
- Architected scalable backend features and authored technical proposals, collaborating with stakeholders to define project scope and improve engagement.

WordPress Developer & Consultant @ Sahm Group

MAY 2015 - SEP 2018

- Managed end-to-end lifecycle of 15+ WordPress projects, including technical support and client documentation.
- Implemented security best practices and performance testing.

Skills & Tools

- WordPress (Core API, custom themes, plugin development)
- PHP, MySQL, HTML5, CSS3, JavaScript
- WooCommerce, Gravity Forms, Elementor, REST API
- Performance Optimization, Security Hardening, SEO Best Practices
- Git
- Code review
